Project Title: Tetris with Friends

1. I want my website to be engaging and explains a brief history of tetris, how to play it, and fun facts of tetris with friends.
2. The resource is: https://en.wikipedia.org/wiki/Tetris and https://en.wikipedia.org/wiki/Tetris_Friends but any external resources are fine.
3. My target audience is for people who enjoy games which is why I wish for the website to be interactive with tetris blocks moving, stacking, or something.
4. The overall message is explaining the boom and popularity of tetris and how tetris with friends shut down May 30, 2019.
5. The tone should be fun, playful, and nostalgic.
6. Visual style can match the tetris with friends' block colors or any of the tetris versions.
