Designer: Drew Mahlmeister

The website is looking a lot more fun, playful c: Maybe include a subheader in history regarding the music of tetris. Under Versions of Tetris, have a couple versions of tetris and then focus on Tetris with friends or just have tetris with friends be the main header and explain that it is one of the versions of tetris. Explain the basics of how to play tetris. The side navigation is adorable as well as the hover over the buttons. It's looking great and keep up the good work!
